REF : Your memo to DD/S dated 12 October 1960.

1. In accordance with authorization by reference memo, this office has started negotiations for procurement and installation of a 200 KW diesel-generator at subject station. Approval for a negotiated contract was given by the Office of General Counsel.

2. Negotiations with the manufacturer's representative of the selected diesel-generator indicates that the unit can be procured and installed for under \$16,000. Contract documents have been drafted and will be forwarded to the supplier by [redacted] the Contracting Officer.

3. It is estimated that about \$4,000 will be required for modifications to the distribution facilities of the plant to permit use of the additional generating capacity for [redacted] distribution system. Such work will be accomplished by a separate contract.

4. It was considered desirable to get the diesel-generator on order as quickly as possible on account of the 75-90 day delivery time required. The work mentioned under paragraph 3 above will follow in due time to complete the installation by the end of March, 1961.
